Lingtong has been appreciating research & development since establishment.

We are:

- Display Technology & Creativity Branch of National Research Institute of Advertisement
- Jiangsu Technology Center
- Jiangsu Engineering Research Center of Exhibition & Display Materials
- Jiangsu Industrial Design Center
- Jiangsu Graduate Workstation
- Jiangsu Postdoctoral Program

Innovation Center takes the international advanced exhibition equipment technology as the direction and takes the enterprise independent development as the main body. We work and communicate with high-end users all over the world, to solve problems in this industry with respective advantages.

Innovation Center takes an area of 2000 square meters, among which laboratory takes 1000 square meters. Equipment includes 3D imager, 3D rapid molding machine, tension lock fatigue machine, bending machine, cutting machine from Germany, aluminum machining center.

Lingtong has obtained 135 patents of independent intellectual property rights, including 5 PCT, 18 patents of invention.

As a pioneer of China Exhibition Industry, Lingtong keeps leading technology development with research and innovation. Lingtong will promote the transformation from wood to aluminum green exhibition system with technology support.

Standard Booth & Upgraded Shell Scheme Booth

Lingtong standard booths have 3 styles: traditional standard booth, fabric frame standard booth and complete set wall standard booth. You can choose one of the styles or mix the styles in different trade shows. Customized solution is available for all 3 styles, in order to meet your customers' special unique requirements.

Standard System

The standard system is widely used in international trade shows as a basic product of aluminum exhibition system. With standard size and multiple angles, various shapes can be realized. It is easy, quick, safe and reusable.

Design System

The design system includes the square aluminum profiles and round aluminum profiles. The size includes: 40mm, 60mm, 80mm, 100mm, 120mm and so on. It could be compatible with standard system and the customized booths realized by design system are simple, noble and impressive.

Double Deck

Lingtong double deck has won praise for its outstanding appearance and structure.

Main features:

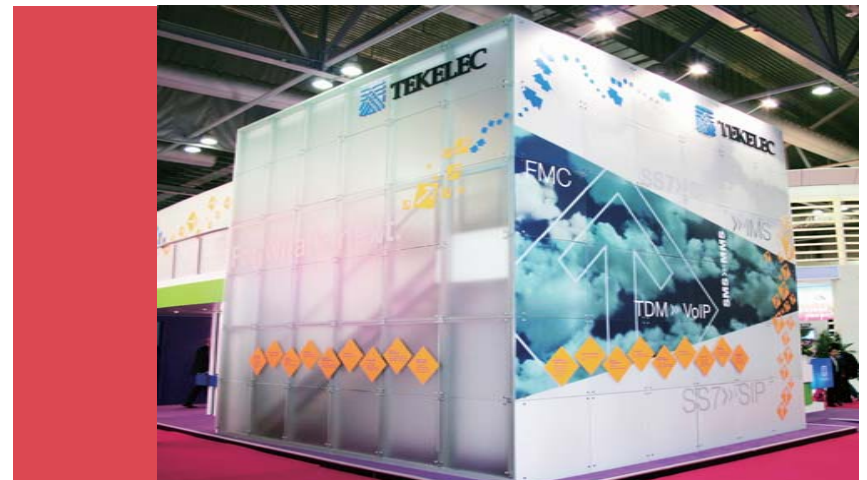

- Compatible with standard system, design system and fabric system
- Light weight & modular, fast & easy to install
- Better cost performance

Wall System

Panel is an essential element in exhibition booth. Lingtong offers glass panel wall, lighting wall, all-sealed panel and complete set wall panel as solid surface. Designers will have more choices with Lingtong wall system.

Fabric System

As a new structure in exhibition booth design, fabric has won widely recognition among exhibition designers. With lightweight material and vivid graphic, it can offer different effects from other textures. Lingtong provides spring connector, fabric retainer, fabric clip, round tube tension fabric structure and SEG fabric structure to combine fabric with aluminum, bringing a new style to this industry.

Floor System

Lingtong floor covers main types of flooring in exhibition and display area, including BM floor, slope floor, adjustable foot floor, stage floor, square extrusion floor and eight-way extrusion floor. It is modular, reusable, durable, adjustable and fast to install, meeting demands of modern trade shows and leading the development trend of exhibition floor.

Showcase

Lingtong showcase provides options of aluminum and plastic frame. We have 19 different styles of aluminum frames, various types with fine material. Lingtong showcase is widely used in exhibition and display. It is convenient for storage and transportation for its demount ability.

Expo Furniture

Exhibition furniture is an indispensable part in trade shows. Lingtong offers various styles with good quality. They are easy to assemble and dismantle and has strong collision resistance, meeting the requirements of exhibitors.

Expo Electrical Equipment

Specifically for trade shows, Lingtong has been developing several types of fast and safe lighting products, making expo electrical equipment more professional and standard.
